

Linux Admin

LINUX ADMIN COURSE CONTENT

SECTION-1 : INTRODUCTION OF LINUX

- What is Linux?
- Why Linux is better?
- Why RHEL?
- Linux in Cloud
- Linux Architecture

SECTION-2 : INSTALLING RHEL9 WITH MINIMAL AND GUI

- File system hierarchy standards (FHS)
- Difference between root and normal user
- Downloading, Installing, Configuring VMware workstation or virtual Box on Windows
- Create a Red hat Virtual machine
- Installing RHEL Server

SECTION-3 : OPERATING RUNNING SYSTEMS

- Basic Commands
- Managing files and directories
- File Compressions
- Filter Commands
- Advanced Filters: sed, grep, find, piping
- Links
- Vi / Vim Editor

SECTION-4: PROCESS MANAGEMENT

- What is a process?
- Process states
- Running processes with background and foreground
- Adjust process priority and kill process
- Process States and Zombies
- Monitoring the current system

SECTION-5: MANAGE USERS AND GROUPS

- Managing Users
- Understanding /etc/passwd, /etc/group, /etc/shadow and /etc/shadow
- Change password and Password aging policies
- Managing Groups
- User account Initializations
- Sudo configurations for users and groups

SECTION-6: FILE PERMISSIONS

- Types of permissions
- What is a umask?
- Changing permissions with chmod
- What is chgrp?
- What is chown?
- Group collaborations with SUID, SGID and STICKY BIT

SECTION-7: PACKAGE MANAGEMENT PART

- Overview of RPM and YUM
- Installing, Erasing and Update a software with RPM
- RPM verifications
- Major and Minor Patches
- Yum packet manager
- Managing Repositories
- Configuring Local Repositories
- Difference between RPM and YUM
- Global repository

SECTION - 8 : THE KERNEL

- What is kernel
- Kernel overview
- Kernel module
- Configuring kernel parameters
- Kernel up gradation
- Update the kernel package Appropriately to ensure a bootable system

SECTION-09 : CONFIGURE LOCAL STORAGE (PARTITIONS)

- Storage names in Linux
- Managing new disks
- List, Create and Delete Partitions on MBR and GPT Disks
- Building a file system on a new disk
- Mount, Unmount and use VFAT, EXT4 and XFS File systems
- Mounting local drives and pen drives
- Making file system persistent
- Virtual memory (swap)

SECTION - 10: FILE SYSTEM SECURITY

- What is an ACL's?
- Diagnose and Correct File permission Problems
- What is quota?
- What are user and group quotas?

SECTION - 11 : EXTENDING FILE SYSTEMS (LVM)

- What is LVM?
- LVM Architecture overview
- LVM Components
- Extend existing Logical Volumes
- Extend volume group
- Troubleshooting LVM

SECTION - 12 : SYSTEM INITIALIZATION

- Boot sequence overview
- BIOS initialization
- Trouble shooting of grub boot loader
- Resetting root password
- File system errors at boot
- MBR reset

SECTION - 13 : DEPLOY, CONFIGURE AND MAINTAIN SYSTEMS

- Configuring networking and hostname resolution Statically and Dynamically
- Configuring network Utilities
- Managing Networking with script files
- Start and Stop Services and configure services to start automatically at Boot
- Troubleshooting Network Connections
- Client DNS Troubleshooting
- Managing Firewalls

SECTION - 14 : REMOTE CONNECTIONS

- What is telnet?
- Configuring telnet and access remote server
- Telnet connection
- What is SSH?
- Establishing secure connection via SSH
- Installation and configuring SSH
- SSH password less Login
- SCP (Secure copying files between Hosts)
- WinSCP
- What is Putty?

SECTION - 15 : DYNAMIC HOST CONFIGURATION PROTOCOL

- Overview of DHCP
- Installing dhcp
- Configuring DHCP server
- Configuring DHCP Client in heterogeneous platform
- Configure fixed ip address

SECTION - 16 : NETWORK TIME PROTOCOL

- What is NTP?
- Introduction to CHRONY SUITE
- chrony Installation and Configuration
- Client time synchronization

SECTION - 17 : NFS FILE SHARING

- NFSV4 Features
- NFS Server and Client
- NFS Server Installation and Configuration
- Mounting NFS share with Auto mounter
- Provide Network Shares Suitable for Group Collaboration

SECTION - 18 : SMB FILE SHARING

- SAMBA Server Overview
- Difference between NFS & SMB?
- SAMBA Server and Client
- Network Shares to Specific clients
- Mounting shares with fstab
- Access windows Users

SECTION - 19 : FILE TRANSFER PROTOCOL

- What is vsftpd?
- FTP Server Overview
- Types of FTP
- Installation and Configuration
- FTP Security
- FTP client commands

SECTION - 20 : DOMAIN NAME SYSTEM

- What is DNS?
- Understanding DNS Server
- Configuring caching only DNS Server
- Troubleshoot DNS Client Issues
- nslookup and dig commands

SECTION - 21 : APACHE WEB SERVER (HTTP/HTTPS)

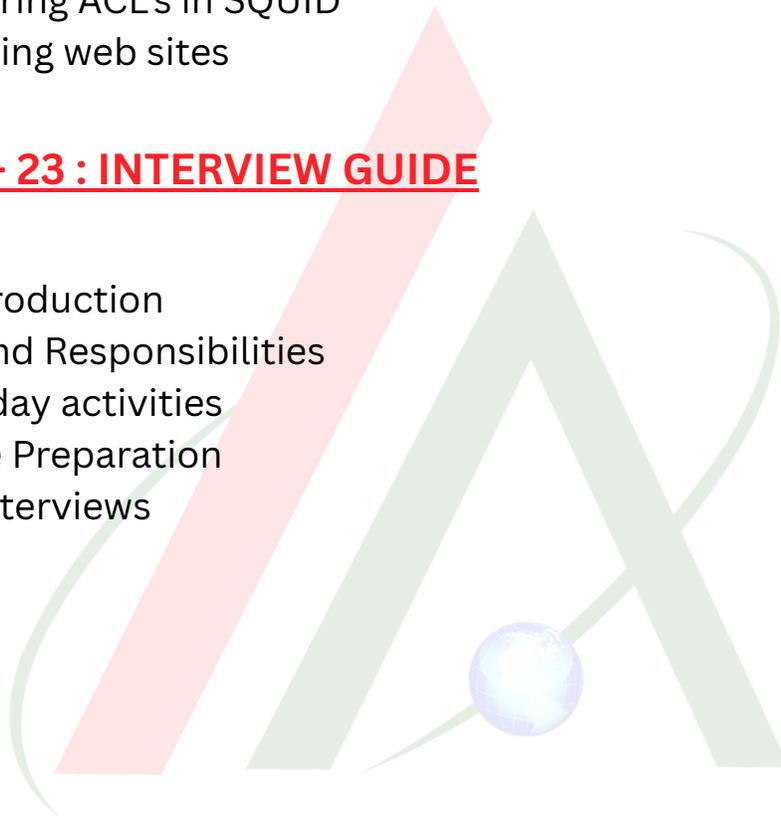

- What are web servers?
- Understanding Apache Web Server
- Install and Configure Apache
- What is Virtual Hosting
- Different types of virtual hostings
- Configuring Private Directory
- Deploy CGI Application
- Web user authentication

SECTION - 22 : PROXY SERVER WITH SQUID

- Overview of squid proxy
- How to share internet
- What is web cache
- Configuring SQUID services
- Configuring ACL's in SQUID
- Restricting web sites

SECTION - 23 : INTERVIEW GUIDE

- Self Introduction
- Roles and Responsibilities
- Day to day activities
- Resume Preparation
- Mock Interviews
